Resolved Issues

The following issues were resolved for Blueprint v10.3:

- When the "UseLegacyDomainName" application setting is set to "true" in web.config, users can be added for any of the multiple domains listed in Settings
(Issue# 19291)

- The Your Reviews panel in the Blueprint Activity Center lists all applicable reviews
(Issue# 19048)

- POST 409 discards are no longer thrown with a hosted Tasktop instance causing higher than normal load on some web servers
(Issue# 18870)

About Blueprint

Blueprint is a Gartner-recognized agile planning and compliance management software vendor that is headquartered in Toronto, Canada and has business units across North America and Europe. Storyteller, Blueprint's leading agile planning and compliance management platform, helps enterprise organizations in regulated industries to drive alignment between business, compliance and development stakeholders throughout complex development cycles in order to deliver high-value and compliant product releases significantly faster, and at vastly reduced cost and exposure to risk.
