Resolved Issues

The following issues were resolved for Blueprint v11.1:

- With the upgrade of Windward to v20.0, Document Generation no longer produces an error due to individual characters not supported.
(Issue# 19229)

- Printing artifacts to PDF or Word using the Print feature no longer produces an error.
(Issue# 17324)

- Syncing Active Directory groups with Blueprint is now executed successfully.
(Issue# 20573)

- Duplicate Reviews are no longer erroneously created causing an error in Analytics.
(Issue# 22123)

- Blueprint now sends Content-Type: application/octet-stream when uploading an attachment or document, eliminating the inability to save or publish an artifact with an attachment.
(Issue# 19359)

Upgrade Advisories

Blueprint Version Support

- With this release of Blueprint 11.1, support will be terminated for the following versions of Blueprint: 9.0 and 9.1. If you have any questions or concerns, please reach out to the Blueprint Support Team.

Known Limitations

The following are the known limitations for Blueprint v11.1:

- Exporting an artifact to a PDF with an Inline Trace as a hyperlink results in all the text below the hyperlink being clickable and acting as a hyperlink in the exported document.

- Exporting an artifact with a Glossary Reference in a rich text field results in a string with visible parameters in the exported document along with the hyperlinked Glossary Reference.

- Exporting an artifact with any angle brackets (< or >) in a rich text field results in the text after the angle brackets not being exported in the generated document.

- Exporting an artifact with properties that are populated with only exclamation marks (!) produces an error and does not allow the document to be generated.

If you require further assistance, or if you have encountered a problem that is not listed above, please submit a support case using the Blueprint Community (https://community.blueprintsys.com).

About Blueprint

Blueprint Software Systems is a global software company and leading provider of digital process discovery and modeling solutions. Blueprint's Enterprise Automation Suite helps organizations automate complex, end-to-end business processes, ensure regulatory compliance across their digital workforce, and scale process automation initiatives across the enterprise. Blueprint's solutions are widely deployed by Fortune 1000 organizations spanning dozens of industries.
