

Release Notes

Storyteller v2.1

This document provides an overview of the enhancement requests that were implemented in this release. It also outlines the known issues, and workarounds if applicable, that you may experience while using Storyteller.

For more detailed information about Blueprint products, please refer to the Storyteller product documentation accessible through the product's user interface, or directly from the Blueprint Community.

Overview

This document provides an overview of the enhancements that were implemented in the Storyteller v2.1 release. It also outlines the known issues that you may experience while using these products. Workarounds are provided, if available. Each item in this document has at least one identifying number associated with it. The ER number is the enhancement request number. Searching for this number in the Blueprint Community will display the enhancement ID details. The internal defect tracking number is also included for reference purposes. When contacting Blueprint for technical support, please reference this number (if applicable).

Please visit <http://community.blueprintsys.com> to access the latest Release Notes and What's New documents. If you require further assistance, or if you have encountered a problem that is not listed below, please submit a support case using the Customer Portal (<http://portal.blueprintsys.com>).

Implemented Enhancement Requests

This release introduces the following changes:

- **Embedded images:** Images can be inserted into rich-text properties of an artifact. ([ER-1756](#))
- **Rapid Review improvements:** Layout options have been added for Rapid Review.
- **Impact Analysis:** Artifact names are now displayed with IDs in the Impact Analysis tree. ([ER-1821](#))

For more information, please refer to *What's New: Storyteller 2.1*.

Known Issues

The following are known issues in Storyteller 2.1.

Issue Number	Area Affected	Description
5082	Quick Search	In the list of search results, sub-artifact results are indented instead of appearing aligned with artifact results.
5164	Embedded images	<p>When performing cosmetic edits to a rich-text property that includes embedded images (such as dragging the image, or changing text formatting), the artifact is not locked and marked with unsaved changes.</p> <p>Workaround: Add then delete a character to ensure the artifact is recognized to have unsaved changes, after which it can be saved or published.</p>

5117	Rich-text properties	Default values for rich-text properties that are cleared will reappear after the artifact is saved. Workaround: If using Blueprint Enterprise, perform the task in the Blueprint experience, as the change will persist there.
4606	Embedded images	In Internet Explorer, an embedded image cannot be removed with the Delete key if it is not followed by text. Workaround: Use the Backspace key, or add text after the embedded image then use the Delete key.
