

# Release Notes

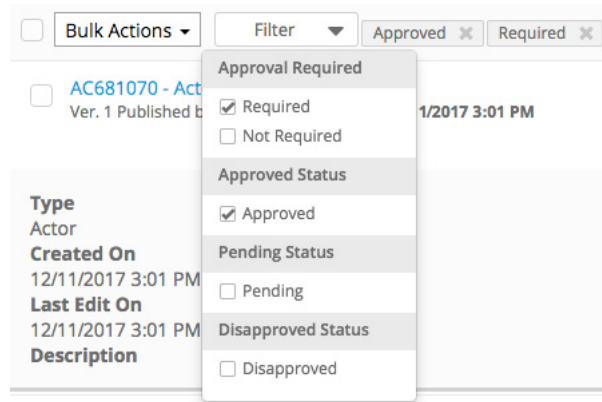

## Blueprint v9.0

This document provides an overview of the new features and enhancement requests that were implemented in this release, and describes any important upgrade advisories and resolved issues. It also outlines the known issues, and workarounds if applicable, that you may experience while using Blueprint v9.0.

For more detailed information about Blueprint, please refer to the Blueprint product documentation accessible through the product's user interface under "Blueprint Help".

## What's New

- The **Review Experience** has been updated to include filtering based on Review Status. Approvers can now easily view all approved or disapproved artifacts, as well as any artifacts still needing their approval. The Review Summary Header has also been improved for added clarity.

- The Blueprint **REST API** has been updated with the ability to create a project. Projects can be created as empty or based off an existing template.
- Instance Administrators can now specify the types of file attachments that can be uploaded to Blueprint by whitelisting certain file types for all artifacts in a project or instance.
- We've added support for Active Directory structure with trusted domains.

## Implemented Enhancement Requests

The ER number is the enhancement request number. Searching for this number in the Blueprint Community will display the enhancement ID details.

- The Review Experience has been updated to include filtering based on Review Status. Approvers can now easily view all approved or disapproved artifacts, as well as any artifacts still needing their approval ([ER-1760](#)).
- In the Review Experience, users are now able to change the approval status of a folder with all its contents. All children in the folder will be marked as approved, disapproved, or pending ([ER-1622](#)).
- The Blueprint REST API has been updated with the ability to create a project. Projects can be created as empty or based off an existing template ([ER-2075](#)).
- We've added the ability to specify the types of file attachments that can be uploaded to Blueprint. Administrators can now whitelist certain file types for a particular instance. If no allowable file types are specified, the system will not restrict what can be uploaded ([ER-2102](#)).

## Resolved Issues

The following issues were resolved for Blueprint v9.0:

- Users making API calls to download an attachment were experiencing long wait times (Issue #7619).
- Deleting text in a Use Case did not lock the artifact (Issue #8541).
- Blueprint users were unable to launch the Review Experience without an additional license (Issue #7316).
- Federated Authentication SAML assertion time was incorrect and resulting in the user being logged out (Issue #7680).
- Running the populatedata script in Data Analytics would cause a duplicate key error (Issue #6519).
- When users attempted to import artifacts via Excel Update, the project list appeared as blank in the Update Artifacts from Excel modal (Issue #6482).
- The XML file generated from a Sealed Baseline would show incorrect tags. The tags within the file would show as not sealed and there would be no timestamp included (Issue #3429).
- Users with a Collaborator license didn't see the Role column in the Participants tab of a Review artifact (Issue #7112).
- Some information was not being shown in the Review Experience when users were selecting a sub-artifact in a Process diagram (Issue #6068).

## Upgrade Advisories

Please note the following advisories before proceeding with your product upgrade.

### Blueprint and Storyteller Version Support

Later this year, for the Blueprint v9.1 release and the Storyteller v3.1 release, support will be terminated for the following Blueprint versions: 7.0, 7.1, 7.2, 7.3, and 7.4; and the following Storyteller versions: 1.0 and 1.1. If you have any questions or concerns please reach out to the Blueprint Support Team.

## Known Issues

The following are known issues in Blueprint v9.0.

- When attempting to open Impact Analysis with a sub-artifact selected, Impact Analysis instead opens the main artifact.

**Workaround:** Click the Source icon  in Impact Analysis and input the sub-artifact ID. The selected sub-artifact ID can be found at the top of the Utility Panel.

*If you require further assistance, or if you have encountered a problem that is not listed above, please submit a support case using the Customer Portal (<http://portal.blueprintsys.com>).*
