## Browser Advisory

Support for Firefox ESR ceases with the release of Blueprint 9.1, please use Internet Explorer 11 to access the application.

## Resolved Issues

The following issues were resolved for Blueprint v9.1:

- Users can have multiple tables in the multiple line rich text field. (Issue#13153 )
- The use case diagram is truncated after document generation is completed. The frame for the image appears to be the correct size but the image is cut off. The issue associated with the Word Export template has been fixed. The use case diagram will be exported properly. (Issue#14501)
- The number of choice properties that flow into Data Analytics has been extended. Users are able to have more than 162 choice properties in the ItemData table. (Issue# 9057)
- The Print to PDF function now works properly for an artifact with a .png file embedded in the description. (Issue# 9476)
- The Print to PDF function now works properly and has been fixed in Windward Version 15. (Issue# 3939)
- The issue where the document generation operation stops at 45% but continues to process in the Performance Monitor has been fixed in Windward Version 15. (Issue# 3934)
- Headers and footers now display correctly in the generated excel document. This issue has been fixed in Windward Version 15 (Issue #3919)
- The error associated with document generation for on-premises customers has been fixed in Windward Version 15. Users should not see the error “Object reference not set to an instance of an object.” (Issue#854)

## Upgrade Advisories

Please note the following advisories before proceeding with your product upgrade.

### **.NET Framework 4.7.1 or newer**

Blueprint Applications Servers now requires the .NET 4.7.1 Framework or newer. Ensure you have upgraded before deploying the Blueprint 9.1 release.

### **Blueprint and Storyteller Version Support**

With the release of Blueprint v9.1 and Storyteller v3.1, support will be terminated for the following Blueprint versions: 7.0, 7.1, 7.2, 7.3, and 7.4; and the following Storyteller versions: 1.0 and 1.1. If you have any questions or concerns, please reach out to the Blueprint Support Team.

### **Storyteller Access**

All Blueprint users can now access Storyteller. All Blueprint/Storyteller systems are set up with a default entry point. If your default entry point is Blueprint, you can access Storyteller by using your regular Blueprint URL and appending /index.html to the end. For example:

**<https://companyname.blueprintcloud.com/index.html>**

If your default entry point is Storyteller, you can access Blueprint by appending /default.aspx to the URL. For example:

**<https://companyname.blueprintcloud.com/default.aspx>**

*If you require further assistance, or if you have encountered a problem that is not listed above, please submit a support case using the Blueprint Community (<https://community.blueprintsys.com>).*
