

System Configuration

Architecture: Blueprint has a highly-scalable layered architecture leveraging modern Microsoft technologies.

Distributed-Server Install: To better scale with the needs of the organization, web and data tiers can be split onto separate dedicated servers. This is recommended for enterprise-level deployments.

	Client	Separate Application Server	Separate Database Server
Hardware	Recommended system specifications: <ul style="list-style-type: none"> • 2 GHz or faster 64-bit CPU (4-core strongly recommended) • 4 GB RAM (8 GB for large deployments) 	<ul style="list-style-type: none"> • 2.5 GHz or faster • 8 64-bit CPU cores • 16 GB RAM • 1 Gbps connection recommended 	<ul style="list-style-type: none"> • 2.5 GHz or faster • 8 64-bit CPU cores • 16 GB RAM • Shared 1 TB SAN
Software	<ul style="list-style-type: none"> • 64-bit OS: <ul style="list-style-type: none"> • Windows 7 • Windows 8 • Windows 10 • Web browsers: <ul style="list-style-type: none"> • Internet Explorer 11 or later (compatibility mode is not supported) • Firefox 19–51, 52 or later (ESR) • Chrome (Impact Analysis, Rapid Review, and Review Experience) • Silverlight 5 • Minimum resolution of 1280x1024 (1600x900 or higher recommended) • NET Framework 4.5* • Microsoft Office 2010, 2013, 2016** 	<ul style="list-style-type: none"> • Windows Server 2012 (IIS 8) or Windows Server 2012 R2 (IIS 8.5) • .NET Framework 4.5.2 	<ul style="list-style-type: none"> • Windows Server 2012 (IIS 8) or Windows Server 2012 R2 (IIS 8.5) • SQL Server 2012, 2014, or 2016

*only required for authoring document templates

** required for Blueprint Analytics and authoring document templates

Single-Server Install: This server configuration contains all Blueprint server components on a single server. Both web tier (IIS) and data tier (SQL), while installed separately, run on a single server.

Client		Application and Database Server
Hardware	Recommended system specifications: <ul style="list-style-type: none"> • 2 GHz or faster 64-bit CPU (4-core strongly recommended) • 4 GB RAM (8 GB for large deployments) 	<ul style="list-style-type: none"> • 16 GB RAM minimum • 2.5 GHz or faster • 8 64-bit CPU cores • Shared 1 TB SAN
Software	<ul style="list-style-type: none"> • 64-bit OS: <ul style="list-style-type: none"> • Windows 7 • Windows 8 • Web browsers: <ul style="list-style-type: none"> • Internet Explorer 11 or later (compatibility mode is not supported) • Firefox 19–51, 52 or later (ESR) • Chrome (Impact Analysis, Rapid Review, and Review Experience) • Silverlight 5 • Minimum resolution of 1280x1024 (1600x900 or higher recommended) • NET Framework 4.5* • Microsoft Office 2010, 2013, 2016** 	<ul style="list-style-type: none"> • Windows Server 2012 (IIS 8) or Windows Server 2012 R2 (IIS 8.5) • SQL Server 2012, SQL Server 2014, or SQL Server 2016 • .NET Framework 4.5.2

*only required for authoring document templates

** required for Blueprint Analytics and authoring document templates

Data Tier Configuration

- Only Windows Authentication mode supported between app server and data tier
- Account used for access must have the following privileges:
 - SELECT, INSERT, UPDATE, DELETE permissions on any object in the Blueprint database
 - EXECUTE permissions on any stored procedure in the Blueprint database
 - VIEW SERVER STATE server permission required to collect Phone Home system information
- Database administrator permissions required only during installation and setup of the Blueprint server.

Network Configurations

- Blueprint operates successfully over standard LAN and WAN connections.
- Recommended maximum latency: 200 ms
- Web tier: port 8080 or 443 (based on IIS and SSL configuration)
- Auxiliary services: port 9101
- If running a separate data tier, the following TCP ports need to be open to the database server
 - 139 & 445 for Windows authentication²
 - 1433 (or configured SQL port)
- Analytics (if applicable): port 8082 or 443
